AI/ML Engineer | Data Scientist

PROFESSIONAL SUMMARY

AI/ML Engineer and **Data Scientist** with hands-on experience in **Machine Learning**, **Generative AI**, **NLP**, **Retrieval-Augmented Generation (RAG)**, and **Data Engineering**. Skilled in building **predictive models**, intelligent document processing systems, **data pipelines**, and AI-powered applications using **Python**, **SQL**, **Scikit-Learn**, and modern AI frameworks. Experienced in **feature engineering**, **model evaluation**, **MLOps** deployment, and **business analytics**.

EDUCATION

MIT World Peace University (MIT-WPU)

Pune, India

B.Tech in Computer Science & Engineering — AI & Data Science | CGPA: 7.54/10

2021 – 2025

EXPERIENCE

AI/ML Intern

Aug 2024 – Feb 2025

eSparse Matrix Solutions Pvt. Ltd.

Pune, India

- Built **feature engineering** pipelines and **machine learning** models for **predictive analytics** and forecasting; deployed **ML models** via **Flask REST APIs** for real-time inference and scalable integration.
- Developed shipment optimisation solution using **clustering** and **regression** techniques, reducing delivery delays by **20%**.
- Designed **OCR-based intelligent document processing** pipeline, improving extraction accuracy by **25%**.
- Performed **data validation**, **preprocessing**, **model evaluation**, and error analysis to improve prediction performance.

Data Scientist Intern

Apr 2025 – Sep 2025

Geeky Vision

Remote

- Built automated **data pipelines** reducing manual effort by **30%**; conducted **EDA**, **feature engineering**, and **data validation** using **Python** and **SQL**.
- Developed **Power BI** dashboards and **KPI** reporting systems, supporting **data-driven decision-making** through analytics and visualisation.

PROJECTS

RAG-Based Document Intelligence System | *Python, NLP, LLMs, RAG, Embeddings*

- Built a **Retrieval-Augmented Generation (RAG)** system for querying large document collections using natural language; implemented **document chunking**, **embedding generation**, **semantic retrieval**, and **context-aware response generation**.
- Developed end-to-end pipeline for **enterprise knowledge retrieval** and **intelligent document search**.

Credit Risk Prediction System | *Python, SQL, Scikit-Learn*

- Developed **ML classification model** to predict customer credit risk using financial and behavioural data; performed **EDA**, **feature engineering**, and **model evaluation** using **Precision**, **Recall**, **F1-Score**, and **ROC-AUC**.

Shipment Optimisation & Predictive Analytics | *Python, SQL, Machine Learning*

- Built **predictive models** using **clustering** and **regression** to optimise logistics operations; reduced shipment delays by **20%** and built **KPI dashboards** for operational monitoring.

Retail Sales & KPI Analytics Dashboard | *Power BI, SQL, Python*

- Built interactive **Power BI** dashboard tracking revenue, profit, inventory turnover, and customer trends across multiple stores; developed **KPI monitoring**, **forecasting**, and executive reporting with automated **data visualisation**.

TECHNICAL SKILLS

Programming & Dev: Python, SQL, Flask, REST APIs, Git

Machine Learning: Regression, Classification, Clustering, Predictive Modelling, Feature Engineering, Model Evaluation, Statistical Analysis, Scikit-Learn

Generative AI & NLP: LLMs, RAG, Embeddings, Semantic Search, Context Engineering, NLP, LangChain, OpenAI APIs

Data Science & Engineering: Pandas, NumPy, EDA, Data Cleaning, Data Validation, ETL Pipelines, PostgreSQL, MySQL, MongoDB, PySpark (Basic)

MLOps: MLflow, Model Deployment, Model Monitoring, CI/CD, Reproducible Pipelines

Analytics & Visualisation: Power BI (DAX), Tableau, KPI Analysis, Dashboard Development, Business Analytics, Data Visualisation

CERTIFICATIONS

National Academic Immersion Program on AI — IIT Jodhpur Technology Innovation and Startup Center

Generative AI in Action — IBM

Artificial Intelligence Fundamentals — IBM
